
AGRÒ EGYPT

About us

AGROEGYPT is a family-owned business. It was founded by Roshdy Ghallab who started his business in 1976 by exporting his first shipment of green beans to the Netherlands.
The business kept growing until 2003 when it was reestablished as AGROEGYPT to include Roshdy's sons who ensured the growth of the company.
AGROEGYPT's main activity is exporting the best-selected Egyptian fruits and vegetables all over the world by maintaining respect for the farmers and the customers. We believe that our company's growing by delivering prime agricultural products and assuring quality control, and the state of the art administration, marketing, sales and export practices.

Navel Oranges

Are easy to spot in your produce aisle. They're the ones with the button formation opposite the stem end. Considered the world's finest orange for eating, navels are seedless, and they peal and segment easily.

Murcott
Mandarin

Murcotts are beautiful shiny, reddish mandarin with a distinct flavor. They are not truly seedless, and will only be absent of seeds if grown in isolation from other citrus.
Their easy peel ability, beautiful color and juicy inside have made them into one of the most planted mandarins in California.

Fremont
Mandarin

Fremont tangerines are bright orange and medium sized. Each oblate fruit is around two and a half to three inches in diameter with a flattened stem end. The skin is brilliant dark orange, smooth, and fairly thin, and like most tangerines, easy to remove. The flesh has few seeds and a lot of juice, and tastes intensely sweet with some acid.

Adalia
Lemons

The lemon is both a small evergreen tree, and the tree's ellipsoidal yellow fruit. The fruit is used for culinary and non-culinary purposes throughout the world – primarily for its juice, though the pulp and the rind are also used, mainly in cooking and baking. Lemon juice is about 5% to 6% (approximately 0.3M) citric acid, which gives lemons a sour taste, and a PTL of 2-3. Many lemon flavored drinks and foods are available, including lemonade and sherbet lemons. The distinctive sour taste of lemon juice makes it a key ingredient in many dishes across the world.

Prepacked in plastic punnets (10 X 500 grams)
The container takes 20 pallets, each pallet takes 120 cartons.

Flame Grapes

Flame Grapes : The flame seedless is a vigorous, heavy- bearing table grape cultivar well in storage. It is a hybrid of Thompson, cardinal and several other vitis vinifera cultivars. It produces large clusters of medium- large red grapes with a sweet flavor.

Flame seedless requires a long growing season. As such, the plants fare poorly in cool, damp zones. However, its good qualities, especially seedlessness, Sweetness, and long shelf life, make it one of the most heavily farmed table grapes.
The flame seedless was first introduced in the 1970s. For a flame seedless to be called good quality, it must be plump, well colored, and firmly attached to the stem. The grapes are usually picked ripe, as they do not ripen after harvest.

Pomegranate

Pomegranate: This fruit usually ranges in size from an orange to a large grapefruit. It has a leathery skin that must be peeled to reveal the hundreds of tiny red seeds. The seeds are entirely edible, crunchy, sweet and berry-like in flavor. Make wonderful syrups, sauces and juice, or may be combined with other fresh fruits for exciting compotes. Rich in potassium.

Every pomegranate is composed of exactly 840 seeds, each surrounded by a sac of sweet tart juice contained by a thin skin. The seeds are compacted in a layer resembling honeycomb around the core. The layers of seeds are separated by paper-thin white membranes, which are bitter to the tongue. The inner membranes and rind are not generally eaten due to high tannic acid content, but they are useful as a skin wash.

Yellow Onion

Also known as a brown onion, is a variety of dry onion with a strong flavor. White inside, its layers of papery skin have a yellow-brown color. It has a rich onion taste and is fit for food dishes like French onion soup. Yellow onions are typically available throughout the year. This onion is higher in sulfur than the white onion, which gives it a stronger, more complex flavor. A dozen varieties of yellow onions are grown following the time of year, they vary in nutritional content.

Red Onion

Sometimes called purple onions, are cultivated of the onion with purplish red skin and white flesh tinged with red.
These onions tend to be medium to large size and have mild to sweet flavor. They are often consumed raw, grilled or lightly cooked with other foods, or added as color to salads, they tend to lose their redness when cooked. Red onions are available throughout the year. The red color comes from anthocyanin's such as cyanide in. red onions are high in flavonoids.
